The speaker is Dr. Ervin K. Thomsen, a Seventh-day Adventist pastor for 36 years. Educated in Denmark and England, he is a graduate of Andrews University

where he received the Doctor of Ministry degree. Serving as a pastor of churches in Michigan, Arizona and California, he has specialized in the study of the Book of Revelation and has preached and taught on the three angels messages (Revelation 14:6-12) in churches and conventions. You will be blessed and encouraged by this positive, practical and Christ-centered approach to the Book of Revelation. He is at the current time the Speaker/Director of *Healing Stream Ministries*, and is the pastor of the Gulfhaven SDA Church in Houston, TX.

"...free to all a healing stream flows from Calvary's mountain."

**The best protection against the beast is
the genuine worship of the Lamb.**

The purposes of the seminar are...

- to take the three angels' message as God's medicine for our own lives before giving the messages to others.
- to uplift the sufficiency of Jesus Christ and His cross.
- to bring positive assurance of salvation.
- to enable Christians to have a genuine, contagious and joyful testimony of Jesus.
- to detect the deceptions of the enemy especially designed for church members.
- to enhance genuine love and fellowship in the local church through the removal of bitterness and unforgiveness.
- to produce spiritually healthy congregations as the best preparation for evangelism and church growth.

The seminar has been presented at...

- Northern California Campmeeting - 2003
- Central California Campmeeting - 1989

WHAT IF HOSPITALS WERE LIKE SOME CHURCHES?

The three angels messages (Revelation 14:6-12) serve not only as warnings of last-day deceptions and prophetic way-marks on our journey toward the second coming of Jesus Christ, but they can also serve as an experiential model for the traits of spiritually healthy churches.

Consider first this comparison between hospitals and churches:

Would you want to be admitted to a hospital where...

- patients were shamed by the staff and other patients for being sick or injured?
- well patients received preferential treatment?
- the sicker you got the less care you received?
- where sick patients were 'discharged'?
- the staff spent most of their time discussing medical science.
- the administration spent a great deal of time convincing patients that the hospital was 'accredited'?
- the main event was the admissions procedure – after that you were mostly ignored by the staff and encouraged to make it on your own.
- the only treatments you received for your disease were reading assignments in medical textbooks?
- the staff did not particularly care about staying updated on the latest discoveries in medical science?
- the only procedures allowed were those practiced decades ago?

Would you want to belong to a church where...

- members were shamed for their sins (and dysfunctions) by the leaders and other members?
- where good people received preferential treatment?
- the more sinful you were the less help you received?
- where sinners were routinely shunned or 'disfellow-shipped'?
- the members spent most of their time discussing correct doctrine?
- the members spent a great deal of time and energy asserting that they were the true church?
- the main event was the baptismal service – after that you were mostly ignored by the church member and encouraged to make it on your own.
- the main treatment you received for your problems was instruction about correct doctrine?
- the leaders were not well-informed about modern issues and had stopped searching the Scriptures.
- only those approaches to ministry, worship and evangelism used decades ago were acceptable.

What is Spiritual Health?

- The willingness to acknowledge sin and wrong knowing that God will not shame us.
- Confession of our helplessness and powerlessness as we recognize sin as a fatal disease.
- The willingness to receive salvation as a free gift; non-resistance to God's healing love.
- Building our self-worth, not on our performance + others' opinions, but on what God says about us.
- Loving God with all our heart, mind and soul and trusting in Jesus Christ for everything.

The Path to Spiritual Health is... (Rev. 14:6-11)

- to detect in our own lives the experiential traits of the prophetic symbols of 'Babylon' and the 'beast' – looking for love and personal significance in all the wrong places (idolatry); the abuse of love and of power; anger, force, fear, threats, intimidation, manipulation, control, pride, self-sufficiency, the need to impress etc.
- to accept *the everlasting gospel* – to receive all the benefits of Christ's redemptive work for us through salvation by grace (covenant salvation). Reject salvation as a do-it-yourself project (contract-salvation).
- *to fear God* – because the fear of God removes all other fears.
- *to give glory to Him* – because to glory in Christ's redemption is God's cure for the 'cancer' of pride. God is most glorified when we are most satisfied in Him.
- *to worship Him* – as we serve God with our praises and the needs of people with His sufficiency
- *to let worship become our witness* as we with joy share our testimonies of our personal contentment in our all-sufficient God. Through such testimonies we magnify God and contagiously attract others to Him.

The Evidences of Spiritual Health are...

(Rev. 14:12)

- *the patience of the saints* – willingness to wait on the Lord, without running ahead of Him, to overcome trials; a super-abiding in Christ, accepting difficult situations without giving God a deadline to remove them.
- *the commandments of God* – to love God with all our heart and others as ourselves.
- *the faith of Jesus* – to depend on Christ's covenant faithfulness and trust Him for everything.

**Spiritual health is to know that
our God is BIG enough
to handle anything.**

This truth saves us from the life-damaging consequences of trying to play god.
